Notes:

Population

Comprehensive Planning collaborates with other local agencies to prepare annual resident population estimates for Clark County and the Cities.

Source: Clark County Department of Comprehensive Planning

Labor Force

The BLS defines the labor force as all persons in the civilian noninstitutionalized population ages 16 and older classified as either (a) employed or (b) unemployed. Balance of Clark County includes three southern Nevada cities (Boulder City, Laughlin and Mesquite) in addition to unincorporated Clark County.

Source: U.S. Bureau of Labor Statistics

Employment

The BLS defines employment as the labor force employed or as all persons who, during the reference week (the week including the 12th day of the month), (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor-management dispute, job training, or other family or personal reasons, whether or not they were paid for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job. Balance of Clark County includes three southern Nevada cities (Boulder City, Laughlin and Mesquite) in addition to unincorporated Clark County.

Source: U.S. Bureau of Labor Statistics

Unemployment

The BLS defines unemployment as the labor force employed or as all persons who, during the reference week (the week including the 12th day of the month) had no employment and were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4 week-period ending with the reference week. Balance of Clark County includes three southern Nevada cities (Boulder City, Laughlin and Mesquite) in addition to unincorporated Clark County.

Source: U.S. Bureau of Labor Statistics

Unemployment Rate

The BLS defines the unemployment rate as the unemployed percent of the civilian labor force. Balance of Clark County includes three southern Nevada cities (Boulder City, Laughlin and Mesquite) in addition to unincorporated Clark County.

Source: U.S. Bureau of Labor Statistics

Number of Occupied Housing Units

The number of housing units currently inhabited by residents. Comprehensive Planning collaborates with other local agencies to prepare annual occupied housing unit estimates for Clark County and the Cities.

Source: Clark County Department of Comprehensive Planning

Persons Per Household

Population estimates for each area are divided by the corresponding estimate for the number of occupied housing units in that area.

Source: U.S. Census Bureau; Clark County Department of Comprehensive Planning; Applied Analysis

Number of Vacant Housing Units

The difference between total housing units and occupied housing units represents the number of unoccupied housing units. Comprehensive Planning collaborates with other local agencies to prepare annual housing unit estimates for Clark County and the Cities.

Source: Clark County Department of Comprehensive Planning; Applied Analysis

Housing Vacancy Rate

The housing vacancy rate represents the ratio of vacant housing units to the total housing units (occupied and vacant) within a given area.

Source: Clark County Department of Comprehensive Planning; Applied Analysis

Jobs Per Household

Applied Analysis used the BLS estimate of employment for each area and divided it by the corresponding estimate for the Comprehensive Planning estimate of occupied housing units for that area. Note that this reflects the residency of the employee, i.e., a Henderson resident working in unincorporated Clark County would be counted as a job in Henderson.

Source: U.S. Bureau of Labor Statistics; Clark County Department of Comprehensive Planning; Applied Analysis

Median Household Income

The midpoint of each area's population income distribution, where half of the individuals or households earn above that amount and half earn below it. The ACS defines median income as the household income in the past 12 months.

Source: U.S. Census Bureau

Median Earnings - All Employment

The midpoint of the earnings distribution, where half of the cases fall below the median and half above the median. The ACS defines earnings as the sum of wage or salary income and net income from self-employment.

Source: U.S. Census Bureau

Median Earnings - Manufacturing

The midpoint of the manufacturing industry earnings distribution, where half of the cases fall below the median and half above the median.

Source: U.S. Census Bureau

Vehicles Available

The total number of vehicles available in each location. Values for the balance of Clark County are estimated based on a weighted average.

Source: U.S. Census Bureau

Estimated Vehicles Per Household

Calculated by dividing the total number of vehicles reported for each area by the corresponding number of households. Values for the balance of Clark County are estimated based on a weighted average.

Source: U.S. Census Bureau; Applied Analysis

Mean Travel Time to Work (Minutes)

The average time in minutes it takes for a worker to commute one way from home to a job, excluding those who work from home.

Source: U.S. Census Bureau

Number of Elementary Schools

Location data is used to calculate the total number of elementary schools in each location.

Source: Nevada Department of Education; Applied Analysis

Number of Middle Schools

Location data is used to calculate the total number of middle schools in each location.

Source: Nevada Department of Education; Applied Analysis

Number of High Schools

Location data is used to calculate the total number of high schools in each location.

Source: Nevada Department of Education; Applied Analysis

Total Enrollment

Location data is used to calculate the total number of students enrolled at schools in each location. Certain special cases such as charter schools, adult education, juvenile detention education and others are excluded from the calculations.

Source: Nevada Department of Education; Applied Analysis

Nevada Star Rating

Location data is used to create a list of each area's schools and their individual school index scores. An average of these scores, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Graduation Rates

Location data is used to create a list of each area's schools and their individual graduation rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 3rd Grade Math

Location data is used to create a list of each area's schools and their individual 3rd-grade math proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 3rd Grade Reading

Location data is used to create a list of each area's schools and their individual 3rd-grade reading proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 8th Grade Math

Location data is used to create a list of each area's schools and their individual 8th-grade math proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.

Source: Nevada Department of Education; Applied Analysis

Percent Proficient - 8th Grade Reading

Location data is used to create a list of each area's schools and their individual 8th-grade reading proficiency rates. An average of these rates, weighted by the enrollment of each school, was calculated for each area.
